

Response to the pre-quotation information request

A point-by-point answer to each item requested, stating what is enclosed, what exists but is not yet in usable form, and what does not yet exist — so the quotation can be built on what is real.

PRODUCER Trypillya Sun LLC, Obukhiv, UA	BRAND Sherlock Secrets	COMPILED FROM 5 files · 2 specs, 3 artworks
RANGE ≈26 main SKUs, 5 formats	FIRST BLOCK PROPOSED 8 SKUs, 5 templates	ARTWORK PLATES 3, at pages 5–7

What you have, what follows, what does not exist Read this first. The five red rows are the ones that shape the quotation.	
Artwork — English Breakfast 100 g, English Breakfast 50 g, Earl Grey 50 g	ENCLOSED
Finished-product specifications — Earl Grey 50 g, Pure Ceylon 100 g	ENCLOSED
Ingredients, origin, shelf life, storage, EANs, on-pack lot-coding fields	ENCLOSED
Physico-chemical panel, mycotoxin and pesticide position	ENCLOSED
Specifications for the remaining 24 SKUs	ON REQUEST
Print-ready vector artwork (AI / PDF-X4, live text)	ON REQUEST
Allergen declarations per raw material + facility cross-contact assessment	IN PREPARATION
IFS Food v8, ISO 9001, FDA registration certificates	ON REQUEST
US-format label — any SKU	DOES NOT EXIST
Nutrition Facts panel — any SKU	DOES NOT EXIST
Nutrition data on a US serving basis	BASIS UNDER REVISION
US responsible party / “Distributed by” entity	NOT NOMINATED
Compostability substantiation for the tea-bag construction	NOT HELD

● PANTONE Process Black C ● PANTONE 533 C ● PANTONE 7621 C ● PANTONE 7475 C ● Gold foil

01 Current packaging and artwork

Three print artworks are enclosed. All are premium cartons: gold foil, congrue blind embossing, gloss varnish 1+0, die-cut, on a shared two-ink base with a SKU-specific accent. Annotated plates for each begin at page 5.

SKU	FORMAT	EAN (UNIT)	ACCENT INK	PLATE
English Breakfast	100 g loose leaf	5065024042400	PANTONE 7621 C	A
English Breakfast	50 g · 25 bags × 2 g	5065024042561	PANTONE 7621 C	B
Earl Grey	50 g · 25 bags × 2 g	5065024042585	PANTONE 7475 C	C

TWO POINTS, SO THEY DO NOT SURFACE LATER AS SURPRISES

There is no US-format label in existence for any SKU. The current packs are built for the EU, UK and CEE markets. The English Breakfast 25-bag back panel is multilingual — English, Polish, Czech, Slovak — names Healthy Beverage Company Ltd (Manchester) as the supervising entity plus a Czech importer, and carries no US responsible party. Please quote this as *new US artwork creation*, not adaptation. Because the panel bears foreign-language text, 21 CFR 101.15(c)(2) makes re-use impractical in any case.

These were supplied as flattened JPGs. Colour build, finishes and coding windows are readable, but small mandatory type and available panel area are not verifiable from a raster. Print-ready vector files are available and will follow for whichever SKUs enter the first block.

ONE USEFUL STARTING POINT

The English Breakfast 100 g front panel already carries a dual net-quantity declaration — **100 g / 3.53 oz**. The two 50 g tea-bag packs are metric only and will need the US customary declaration added.

Each pack carries an on-pack variable-data coding field — *Date of production / Best before / Lot* — in a 30 × 16 mm window at 2.5 mm character height.

02 Ingredient lists and product specifications

Two finished-product specifications are enclosed, issued by our Quality & Food Safety function against ISO 9001 and IFS v8.

	EARL GREY 50 G (25 × 2 G)	PURE CEYLON 100 G LOOSE
Document	12391211 v.1 · 16.02.2026	12381106 v.1 · 15.01.2026
Ingredients	Black leaf tea; natural additive (lemon peel)	Black leaf tea
Flavouring	Bergamot and lemon	None
Origin	Kenya	Sri Lanka (Ceylon Island)
Shelf life	2 years	3 years
EAN unit / carton	5065024042585 / ...592	5065024042387 / ...394

Each specification also carries the full physico-chemical panel — water extract, ash fractions, ash alkalinity, acid-insoluble ash, crude fibre, moisture, foreign and metallic matter — the microbiological position (Aflatoxin B1 not

detected), and a pesticide statement (“within the level of EU regulation”). For English Breakfast the ingredient position is on-pack — **black tea; countries of origin India, Kenya, Sri Lanka** — but the specification has not yet been issued.

COVERAGE GAP IN THIS FIRST SAMPLE

SKU	SPECIFICATION	ARTWORK
Earl Grey 50 g	HELD	HELD
Pure Ceylon 100 g	HELD	MISSING
English Breakfast 100 g	MISSING	HELD
English Breakfast 50 g	MISSING	HELD

Only Earl Grey 50 g is a complete matched pair. If a matched set is what you need to scope accurately, say so and we will issue the two missing specifications and the Pure Ceylon artwork before you begin.

Nutrition Facts and the underlying compositional data

This is the largest gap, and we would rather flag it than let you find it. **No US-format Nutrition Facts panel exists for any SKU**, and none of the current artwork carries a nutrition panel at all. What exists is an EU-style declaration inside each specification, stated per 100 g of product:

SKU	ENERGY	FAT	CARBOHYDRATE	PROTEIN
Earl Grey 50 g	0.02 kcal / 0.1 kJ	0 g	0.003 g	0.001 g
Pure Ceylon 100 g	0 kcal	0 g	0 g	0 g

THESE FIGURES CANNOT BE CARRIED INTO A US PANEL AS THEY STAND

They are labelled “per 100 g of product”, but dry black tea leaf is in the order of 250–350 kcal/100 g, and even a brewed infusion is around 1 kcal/100 mL. They look like brewed-infusion values entered into an “as sold” field, and they are not consistent between the two SKUs — 0.02 against 0. We are re-establishing the basis internally.

We would welcome your recommendation on the route. Our working assumption: plain tea declared on a serving of one tea bag (2 g), or one teaspoon of loose leaf, making 8 fl oz (240 mL) prepared — consistent with the RACC at [21 CFR 101.12](#) — all values zero, using the simplified format under [21 CFR 101.9\(f\)](#) with the “Not a significant source of...” footnote.

If you agree, please quote on that basis and tell us whether you need laboratory certificates of analysis or will accept a validated database calculation. If either the small-package or the low-volume exemption is realistically open to us, we would like that assessed inside the first block — it materially changes the cost across 26 SKUs.

Allergens, origin, lot coding and durable life

ALLERGENS

Both specifications state “**No Allergen**” and “**Non GMO**”. We recognise a bare statement is not sufficient evidence for a US position. We will provide signed allergen declarations for each raw material together with a cross-contact assessment for the Obukhiv facility, covering all nine US majors including sesame. Please confirm the format you want these in.

COUNTRY OF ORIGIN

Earl Grey — Kenya. Pure Ceylon — Sri Lanka. English Breakfast — India, Kenya, Sri Lanka. Blending and packing are carried out at Trypillya Sun LLC, 46 Trypolska str., Obukhiv, Kyiv region, 08700, Ukraine. **The current artwork carries no “Product of Ukraine” marking.** We would like your determination on whether blending and packing in Ukraine constitutes substantial transformation for CBP marking under [19 CFR 134](#) — one answer applies across the whole range, and we would rather settle it once.

LOT CODING

The coding field is already in the artwork, so no structural change is needed. We would like your recommendation on an unambiguous US date format — we are conscious of the DD/MM against MM/DD problem — and on whether 2.5 mm character height is adequate.

DURABLE LIFE

Shelf life differs by SKU and format: **2 years** for Earl Grey 50 g tea bags, **3 years** for Pure Ceylon 100 g loose. Storage conditions are common across the range — dark, dry, ambient maximum 25 °C, RH below 75 %, original closed containers, odour-free storage area.

REGULATORY STANDING

The facility holds **IFS Food v8** (to November 2026) and an **FDA food facility registration** (stated valid to December 2026). We note 2026 is a biennial renewal year with the window running 1 October to 31 December, and we will confirm our US Agent appointment.

05 Claims and marketing statements on pack

Current on-pack claims fall into three groups. Verbatim panel copy for each SKU is reproduced on the artwork plates that follow.

SENSORY AND DESCRIPTIVE — LOW RISK, US WORDING TO REVIEW

“A traditional blend of three varieties of tea — bright malty taste of Indian Assam tea with natural strength and fullness, deep rich velvety taste of Kenyan tea, rich honey aroma of Ceylon tea. This tea perfectly tastes good with sugar and milk.” (English Breakfast 100 g). Earl Grey carries an equivalent bouquet description. Each pack also carries a brewing instruction block.

IDENTITY DESCRIPTORS ON THE FRONT PANEL

“RICH BLACK TEA”, “BLACK TEA WITH BERGAMOT AND LEMON AROMA”, “premium quality”. We expect “aroma” to need re-working into US common-or-usual name and “natural flavor” conventions under [21 CFR 101.4](#).

THE ENVIRONMENTAL CLAIM — YOUR VIEW FIRST, PLEASE

The English Breakfast 25-bag pack states: **“Our teabags are compostable. Suitable for home composting.”** We understand that under the FTC Green Guides ([16 CFR 260.7](#)) an unqualified compostability claim carries a real substantiation burden in the US, and that a home-composting claim would need third-party certification covering the entire bag construction — filter paper, thread, tag and seal.

Please advise whether to **(a)** substantiate and qualify it, **(b)** reduce it to a material statement, or **(c)** remove it from the US artwork. This affects every tea-bag SKU, so we would like it settled inside the first block rather than repeated 26 times.

We would also flag two brand-level claims used in our trade materials, in case they migrate onto US packaging or the US website: “*Top 5 tea brand in Ukraine*” and “*No. 2 packaged tea company in Ukraine*”. Both are substantiable but competitive, and we assume they need review before any US use.

06 Scope for the quotation

The range is approximately **26 main SKUs** — 7 loose teas, 9 sachet products, 7 tea-bag products and 3 in a new line — plus 100-count variants of English Breakfast and Earl Grey, across five formats. Rather than 26 independent projects, these collapse into **five composition templates**, and we would ask you to price on that structure. Once a template is cleared, each additional SKU inside it is variant work.

TEMPLATE	DESCRIPTION	SKUS	EFFORT
T1	Single-origin unflavoured tea	Pure Ceylon, Rich Assam, Pure Green, The Finest Ceylon	Lowest
T2	Multi-origin unflavoured blend	English Breakfast (loose, 25 bags, 100 bags)	Low
T3	Flavoured black tea	Earl Grey, Bergamot Prime	Medium
T4	Botanical / herbal blends	Pleasure Time, Spring Feeling, Alpine Meadow, Green Melissa, Jasmine, Milk Oolong	Highest
T5	Format variants of a cleared template	100-bag versions, 180 g large loose packs	Lowest

PROPOSED FIRST BLOCK — 8 SKUS, EVERY TEMPLATE REPRESENTED

01 · T1 Pure Ceylon 100 g loose SPEC HELD Simplest case. Specification already issued.	02 · T2 English Breakfast 100 g loose ARTWORK HELD Multi-origin blend; already carries a dual net-quantity declaration.	03 · T2 / T5 English Breakfast 50 g · 25 bags ARTWORK HELD Bag format, and the pack carrying the compostability claim.	04 · T3 Earl Grey 50 g · 25 bags COMPLETE PAIR The only spec + artwork pair held today. Flavoured reference case.
05 · T1 Pure Green 100 g loose TO FOLLOW Green tea — separate nutrition and origin basis (China).	06 · T4 Pleasure Time 22 sachets × 2 g TO FOLLOW Most complex composition: rose petals, orange flowers, lemongrass, passionfruit and mango flavouring.	07 · T3 / T5 Bergamot Prime 180 g loose TO FOLLOW Large loose format, second flavoured case.	08 · T4 Milk Oolong 100 g loose TO FOLLOW Oolong identity, and a name we want reviewed early: the product contains no milk.

If you would prefer a block of five, we suggest items 01–04 plus item 06, which still touches four of the five templates.

PLEASE PRICE THESE SEPARATELY

- **Per-SKU US label build** — Nutrition Facts panel, ingredient statement, allergen and origin statements, net-quantity conversion, responsible-party block.
- **The four cross-cutting determinations, priced once for the whole range rather than per SKU** — nutrition basis and RACC; the compostability claim; country-of-origin marking; US responsible party and FSVP structure.
- **Artwork implementation against review-only** — we hold in-house pre-press capability and may execute the artwork ourselves to your specification.
- **Volume pricing for the remaining ~18 SKUs**, on the assumption that once a template is cleared each additional SKU inside it is variant work.

Items 05, 07 and 08 are not yet in the shared folder. Confirm the block you want and we will send specifications and print-ready vector artwork for all eight within the same week.

One plate per supplied artwork. Each reproduces the print specification, the verbatim panel copy read off the file, and a schematic of the carton faces with the US mandatory elements pinned to where they sit — or where they are absent.

The schematics are compliance diagrams drawn to scale ratio, not reproductions of the artwork; the source file is named on each plate and the print-ready vector remains the controlling document.

BACK PANEL COPY, VERBATIM (ENGLISH)

SHERLOCK SECRETS ENGLISH BREAKFAST BLACK TEA, TEA BAGS. Ingredients: black tea. Countries of origin: India, Kenya, Sri Lanka (Ceylon Island), 25 tea bags each. Net weight: 50 g. Date of manufacture is indicated on the package. Store in a dry place, in a tightly closed packaging. See brewing instructions on the package. Our teabags are compostable. Suitable for home composting. Produced under the supervision of: HEALTHY BEVERAGE COMPANY LTD, Initial Business Centre, Unit 7, Wilson Business Park, Manchester, United Kingdom. Production facilities located in Ukraine: LLC Trypillya Sun, 46 Trypilska str., Obukhiv, Kyiv region, 08700, Ukraine.

Polish, Czech and Slovak translations of the same statement follow on the panel, plus a Czech-market importer line.

- 1 Net quantity is metric only. “1.76 oz” must be added alongside 50 g.

3 Nutrition Facts absent.

5 Lot / date coding field present and correctly sized for variable data.

8 Home-composting claim. Highest-risk statement in the set under FTC Green Guides 16 CFR 260.7.
- 2 Statement of identity to be reviewed against US naming.

4 UK entity and Czech importer only — no US responsible party.

7 Four-language back panel. Triggers 21 CFR 101.15(c)(2) — a dedicated US pack is the only practical route.

6 No “Product of Ukraine” marking — origins are given for the tea only.

Plate C — Earl Grey

EARL GREY ... THE CLASSIC ... SELECTED BLACK RICH TEA
AND FRAGRANT BOUQUET IS COMPLEMENTED BY SUNNY
[LEMON] ... THAT EVERYBODY WILL LOVE

NET WEIGHT: 50 g · 25 tea bags × 2 g
Date of production: Best before: Lot:

Ellipses mark text not fully resolvable from the flattened JPG. To be confirmed against the vector original.

- 1 **Net quantity is metric only.** “1.76 oz” must be added alongside 50 g.
- 3 **Nutrition Facts absent.** The matched spec's 0.02 kcal/100 g figure is not usable — see section 03.
- 5 **Lot / date coding field present.**
- 9 **“...WITH BERGAMOT AND LEMON AROMA”.** EU construction; US convention is “natural flavor” (21 CFR 101.4). Note the spec also declares lemon peel as an ingredient, which the front panel does not reflect.
- 4 **No US responsible party.**
- 6 **No “Product of Ukraine” marking;** origin (Kenya) appears in the specification only.

Compiled from the five files in the shared folder — finished-product specifications 12391211 and 12381106, and artworks for English Breakfast 100 g, English Breakfast 50 g and Earl Grey 50 g. Portfolio figures are drawn from the Sherlock Secrets 2025 product catalogue. Panel copy was read from flattened JPGs; the print-ready vector files remain the controlling documents. Plate schematics are compliance diagrams, not reproductions of the artwork. Regulatory references are cited for discussion and are not a legal opinion.
